Dairy Breeds Trading Cards

Student Name: _____

Directions: After participating in a classroom presentation hosted by the Oregon Dairy Princess Ambassador, record what you learned about dairy cow breeds as you create a dairy cow trading card.
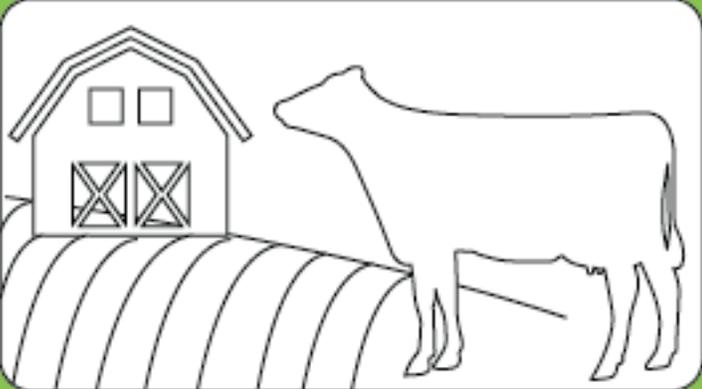

1. Choose a name for your dairy cow and write in the blank provided (Meet: _____) on the card below.
2. Next, choose a dairy cow breed you would like to feature on the trading card. Write the name of the breed in the space provided on the card.
3. Color the cow in the picture based on the color of the breed you chose. Then color the rest of the image.
4. Below the picture, fill in where your cow originated from or with your own hometown.
5. Under the milk production category, write the average amount of milk in gallons produced by a dairy cow in a day.
6. Choose an age for your dairy cow, make sure she's over 2 years old (remember, cows start producing milk after they are two!) Write the age in the space provided.
7. On the back side of the card, write three facts you learned about the breed or general dairy related facts. Write one fact in each shape.
8. Cut out both the front of the card and the back of the card.
9. Glue the two sides together, making the picture side stick out.
10. Enjoy your trading card and share it with family and friends!
