

Wheel of Nutritious Dairy Products

Name: _____

Directions:

1. Using the spinning wheel below, draw a different dairy product in each section below the words. Make sure to not draw too low or it will be covered after you mount the spinning wheel.
2. Cut out the spinning wheel below.
3. Cut out the center circle of the spinning wheel marked "cut out"
4. Cut out the other small circle in the bottom right corner of this page. Cut the lines which will create four flaps. Fold up two of the opposing flaps.
5. Cut out the cow on the next page.
6. On the cow, cut out the circle located in the middle, also cut the strip above the circle. Both of these are labeled "cut out."
7. Using the flaps of the small circle, place the flaps through the center of the spinning wheel.
8. Next flip the spinning over, and glue or tape the back side of the small circle to the back of the spinning wheel.
9. Flip the spinning wheel back over, picture side up and connect to the cow. Thread the flaps through the circle hole on the cow. Once the two flaps are through, fold the flap flat against the cow to keep all the pieces together.
